

14th November 2007

New Passenger Car Registrations *European Union + EFTA Countries*

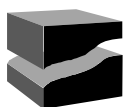

*Not adjusted for working days

Demand for new cars in Europe back on track in October

In October, new passenger car registrations in Europe (EU27+EFTA) were 5.5% higher than in the same month in 2006, thanks to one extra working day in the whole region and a general upswing in most of the main markets. West European countries improved their result by a sound 4.8% and the new Member States remained on a growth path (+11.8%). Thanks to this month's result and an upturn during the summer, there were almost 13.6 million cars registered in Europe through October, 1.2% more than in the same period last year.

As regards the main markets, only Germany saw its registrations drop once more **in October** (-4.1%). Influenced by an increase in sales taxes in January 2007, new car registrations in Germany are likely to remain well below 2006 level until the end of the year. In contrast, France (+9.1%), Italy (+8.5%), the UK (+8.4%) and Spain (+3.4%) showed a surplus in their registrations. So did all the remaining EU15 countries with the exception of slightly declining Austria and Finland (-1.4% and -0.5%, respectively). Most of the new EU members posted solid growths, and the most dynamic markets were Lithuania (+56.8%), Slovenia (+26.4%) Bulgaria (+19.3%) and Poland (+18.2%).

New passenger car registrations in Europe showed an increase of 1.2% **between January and October 2007** compared with the first ten months of 2006. A continuous upturn in the new EU members (+14.9%) and the October growth in the whole region positively influenced the cumulative ten-month figures. Of the largest markets, Germany (-7.6%) and Spain (-1.5%) reduced their losses and the UK (+2.5%), Italy (+6.9%) and France (+1.2%) strengthened their results. Apart from Hungary (-7.5%), the number of new cars registered in all other new member states was above last year's level.
